

About Cedar Spa

The gifts the Earth offers are plentiful. Those bountiful gifts also nourish our souls and guide the mind through sensory experiences inspired by local indigenous ingredients including sweet grass, cedar, and other olfactory-stimulating essences. For hundreds of years, herbs and plants have been used to hydrate, heal, and soothe the skin. At Cedar Spa, we have incorporated many of these gifts into our spa offerings, with a touch of science to make them even more effective.

Our spa therapies utilize herbs, plants, and trees. From head to toe, natural clean products are used to deliver efficacious facial, nail, body, and massage services. Our massage services utilize natural organic oils and blends including aromatherapy essences. Our body treatments utilize profoundly exquisite earthly elements such as clay and muds, salts, natural oils and more. Each indigenous ingredient blends cohesively to relax, revitalize, refresh, or renew. Each service addresses different guest's needs, from sore muscles to the lack of sleep and from dry skin to sunburn relief. Our facial treatments have been developed for every skin type and most skincare concerns. From organic naturals to clean science-based products, you will want to try them all!

Winds and Water Journey - Women's and Men's Lounges

Before your spa journey begins, experience our therapeutic circuit in either of our men's or women's lounges. Complimentary use of a lush robe and spa sandals prepares you for your journey. This area was developed to stimulate every sense and is a place you will want to relax and recharge for an hour or half a day before or after your services. Our spa hosts work to anticipate all needs of their guests. Your journey can begin or end with an herbal steam experience, dry sauna, a session in our vitality pool or by just lounging on our heated relaxation lounges. These enveloping havens are complimentary to spa guests before and after their (service of 50 minutes or more) treatment.

A beautifully appointed pair of relaxation lounges allow our guests to relax between their treatments. One co-ed lounge is also available for both men and women to mingle together before or after their treatments.

During your lounge experience, you may choose a therapeutic intention based on your individual desires. Each involves the use of the amenities contained within the lounges; however, each is focused on delivering your desired result. Of course, your health is our utmost concern. If the use of heat generated by the sauna or steam areas is contraindicated, please alert us in advance.
